

Primary:

1. "As a new user, I will be redirected to create a new account by logging in with my Google username and password. Once I have entered the application, I will be offered the option of connecting my GoogleFitness account to the application as well. Doing so will sync my fitness statistics for the day to the application."
2. "As a user trying to log in, I will be redirected to login with my Google username and password."
3. "As a logged in user, I want to be able to determine how many calories I should consume in a meal based on my calories burned per day."
4. "As a logged in user, I want to be able to type in what kinds of foods I want to eat in order to be provided a list of options that are similar to what I want."
5. "As a logged in user, I want to be able to find recipes that meet my allotted calorie count and my dietary restrictions/preferences in order to maintain a healthier lifestyle."

Secondary: Additional features of the application

6. "As a user trying to log in, if my login credentials are incorrect, I'll have the option to reset my username or password. If I do not need to reset my username or password, the page will display an "Incorrect username/password" error and I will be able to try entering my information again."
7. "As a logged in user, I want to be able to visualize daily caloric intake."
8. "As a logged in user, I want to be able to visualize my health statistics in a way that will show me how far I am from meeting my step goals, calories burned goals, stairs climbed goals, etc."
9. "As a logged in user, I want to be able to consume more calories than suggested by manually selecting a different calorie range."
